

CYBER SECURITY

Information Technology Company, LLC provides a comprehensive suite of cybersecurity services and solutions encompassing **FedRAMP, GovRAMP, and FISMA** cybersecurity services and solutions.

Since 2017, our experience in supporting our clients' cybersecurity efforts has brought substantial expertise in providing Security Assessment and Authorization (A&A) adhering to National Institute of Standards and Technology Special Publication (NIST SP) 800-53 Revision 5 security and privacy controls; Vulnerability Scanning and Penetration Testing; System Security Engineering and Architecture activities; FedRAMP and FISMA Assessment and Authorization (A&A) Compliance; Risk Assessments and Gap Analysis; and Security Policy Development.

ITC guides Cloud Service Providers (CSPs) and Federal Agencies through the disciplined multi-step FedRAMP assessment process, from the initial current environment inventory; through full documentation of capabilities, processes, and security; to the final and ongoing documentation of satisfied requirements. This leads to a **comprehensive, consistent, coordinated, and compelling** certification package for a successful **Authority to Operate (ATO)**.

ITC **delivers mission-focused, rapidly deployed, scalable, optimized, and secured** IT and cyber security solutions for the on-demand support of clients. ITC implements digital services to provide the right combination of emerging tools and practices to develop and deliver effective solutions.

COMPLIANCE

- FedRAMP/GovRAMP 3PAO Assessments
- FISMA/RMF NIST 800-53 Assessments for Federal ATO
- CIS Benchmarks & DISA STIGs based Assessments
- CMMC Assessments

PENETRATION TESTING

- Best in Breed Tools
- In House Testing Expertise
- Real Risk Ratings
- Detailed Reporting
- Security Awareness and Social Engineering Testing

CONTINUOUS MONITORING

- Asset Discovery
- Boundary Review
- Plans of Actions and Milestones (POAM) Review
- Vulnerability Scanning
- FedRAMP PMO/Agency Report Validation

SECURITY TEST AND EVALUATION

ITC offers a comprehensive assessment of the management, operational, and technical security controls in an information system that will determine correct implementation, intended operating procedures, and desired outcomes for ITC benefits agencies in their effort to achieve total system security by creating comprehensive, periodic security assessments including network vulnerability and infrastructure penetration tests.

The ITC project-based portfolio of vulnerability assessment and penetration testing services enables our clients to optimize their Information Technology (IT) environments by driving efficiency, flexibility, and productivity while reducing costs. We will incorporate best practices and proven methodologies developed over years of field experience that ensure predictive quality of delivery, security, and compliance.

Information Technology Company, LLC (ITC) ensures a best-in-class partnership in helping government agencies, commercial organizations, and Cloud Service Providers (CSP) with Federal Information Security Modernization Act (FISMA) and Federal Risk Authorization Management Program (FedRAMP) compliance. Built on ITC's long relationships with the Department of Homeland Security (DHS) Customs and Border Protection (CBP) and the Government Accountability Office (GAO) providing cybersecurity assessment support, the company combines technology, proven methodologies, and experience to help its customers reduce risk and achieve maximum security.

Our customers include the Claes Fornell International (CFI) Group, USA, L.L.C, the National Association of State Workforce Agencies (NASWA), the Office of Personnel Management (OPM), the Department of Education (DOE), the National Transportation Safety Board (NTSB), and the Air Force Life Cycle Management Center (AFLCMC).
